

Certificate of Compliance

Dear Valued Customer:

Texas Cement Products, Inc. certifies that the products listed as complying with EQ Credit 4.1: Low-Emitting Materials: Adhesives & Sealants in the document titled "TexRite Products Contributing To LEED Points" comply with the requirements set forth in the California South Coast Air Quality Managements District's Volatile Organic Compounds (VOC) Rule 1168. The U.S. Green Building Council has established the requirements in Rule 1168 as the criteria used to determine eligibility for products to contribute points toward LEED certification of buildings under the Indoor Environmental Quality category. The Material Safety Data Sheets (MSDS) for TexRite products contain the specific amount of VOC contained in each individual product.

Texas Cement Products, Inc. certifies that the products listed as complying with MR Credits 4.1 and 4.2 in the document titled "TexRite Products Contributing To LEED Points" contain 10 or 20 percent Post-Consumer Recycled Materials as indicated according to the guidelines set by the U.S. Green Building Council.

Texas Cement Products, Inc. certifies that the products listed as complying with MR Credits 5.1 and 5.2 in the document titled "TexRite Products Contributing To LEED Points" contain 10 or 20 percent Regional Materials; Extracted Processed and Manufactured within a 500 mile radius of the Texas Cement Products, Inc. manufacturing facility located at 4000 Pinemont, Houston, TX 77018 and the finished products are manufactured at Texas Cement Products, Inc. located at 4000 Pinemont, Houston, TX 77018 in accordance to the guidelines set by the U.S. Green Building Council.

Texas Cement Products, Inc. strictly adheres to the guidelines set forth by the Environmental Protection Agency for site management, material handling and landscaping to advance the mission of protecting human health and the environment.

Sincerely,

Son Le
Technical Director
